

THE JOURNEY SCHOOL OF HOUSTON

The Journey School of Houston believes by breaking past the boundaries of a school building; we can create a community where we all have a sense of belonging and feel valued.

The Journey School of Houston kids were thrilled to host the first Journey Community Run Club.

community connection

giving thanks

We work with partners in the community to extend the boundaries of the classroom. The Houston area is full of people and places that can stimulate the academic experience of our students. As we continue our *Journey*, we intend to partner with individuals who will maximize the potential of our students, our community.

Faithful Paws, a group of volunteers and their therapeutic dogs, visit the students weekly providing them with safe opportunities to engage and build relationships. Adriana Crane, LCSW, and Monica Altamirano, M.A.,L.P.C. support TJSH by giving their time and service to families, students, and educators. The University of Houston MVP team will begin mentoring and sharing their expertise and skills with our students.

We had a great turn out for the first *Journey Community Run Club*. We look forward to continuing the fitness program while providing support our students build long lasting friendships. We will continue the run club next semester, and look forward the growth of the *Journey Community* through new partnerships.

digital apps in use

Educators looking to engage our "digital natives" should first consider the student's strengths and weaknesses in the classroom. For students who excel with immediate feedback, challenging rewards, and a dynamic approach to Mathematics or Language Arts; web based learning like IXL could be an option for those students. IXL Learning is an adaptive application used for Math and Language Arts to practice and master concepts and skills.

Web based applications like Storybird and PowTown creates an opportunity for students to approach Reading, Language Arts, and Multimedia Art on a visual platform. Giving students an option for expression can benefit the student by allowing creativity and imagination to meet the academic objectives in the classroom.
